Personal Profile

Completed first year in Artificial Intelligence at Brunel University. Learnt Java and MySQL. Created a mini project that required programming a mini robot

Currently enrolled in a Digital Skills Bootcamp at JustIT Training. Aiming to improve my skills further and grasp a better understanding of software languages (HTML, JavaScript and Python). Working on my portfolio to create some personal project.

Would like to work as a Junior Developer to gain more skills and experience. I thrive working in a challenging environment to push my skills and limit.

IT Skills

Software Development Skills: Python and MySQL

Web Technology: HTML5, CSS3 & JavaScript

Core Programming Languages: JavaScript and Python

Projects:

- Created a working Quiz website with a timer and scoreboard.
- Created a database for a restaurant and implemented it on their website to help customers view their products.

Employment History

2017-2021 Store manager at Dominos

- As a store manager, I was responsible for opening the shop at the right time and organising food in the inventory.
- As the face of the store, it was vital that all the customers were treated equally by myself and the staff with the utmost respect.

- Responsible for communicating verbally and via e-mails with the team members, food seller and HR to keep transparency.
- Created a good working environment for different staff members to work efficiently together even though they had different backgrounds and beliefs.
- Ensured that I kept a backup plan for potential failures and adapted to situations while keeping my cool.

2015-2017

Bartender/Waiter at Leisure Jobs

As a Bartender and waiter, I was responsible for managing inventory, handling cash and serving customers while maintaining high standards.

Interests and Achievements

Computing: Created a working website for World Debate Club as free project to gain some experience and improve my skills. <https://idebate.org>

Hobbies:

- Reading
- Going out
- Cinema
